Inventory Software

Carlson Inc.

- Login/Logout using corporate logins and passwords
- Search and display your Inventory
- Create Inventory
- Remove Inventory
- Change Inventory Quantity Counts and Status's

Objective

Development of a plug in Inventory Management Application that works in the field for your technicians to speed up your inventory validation across your Network Infrastructure saving your corporation time and money. Technicians need an inventory system that will keep track of actionable inventory that is user friendly, efficient and accurate to have that equipment on hand for your customers.

- Efficient in Validating Inventory by CLLI or product information.
- Software is portable and can be utilized as a stand-alone platform.
- Identify available, in-service, lost, pending return, and spare equipment.
- Ability to change status and inventory counts.
- Ability to Add and Remove Inventory.

A glowing yellow tent is pitched on a dark, rocky mountain peak at night. The tent is illuminated from within, casting a warm yellow light. The background shows a dark blue sky with a few stars and a bright moon in the upper right corner. The mountain's surface is rugged and covered in rocks and patches of snow.
